

North Air Harness Lumbar Support Adjustment

How to inflate your lumbar support on your harness for a cushion ride!

Helpful Tools:

- Hands and mouth

On the back of your North harness you will see the Air Back pouch.

This is where you inflate your Lumbar Support.

Pull nozzle and start blowing. A little air makes a big difference.

When the lumbar is inflated enough for your liking, close nozzle.

Push all the way in and secure.

Re-secure velcro.
